Aims & Scope

Confluentes Mathematici aims to publish high quality mathematical research articles concerning two or more distinct research areas. All domains of Mathematics (pure and applied) and Mathematical Physics will be considered, as well as the History of Mathematics.

Selected Papers

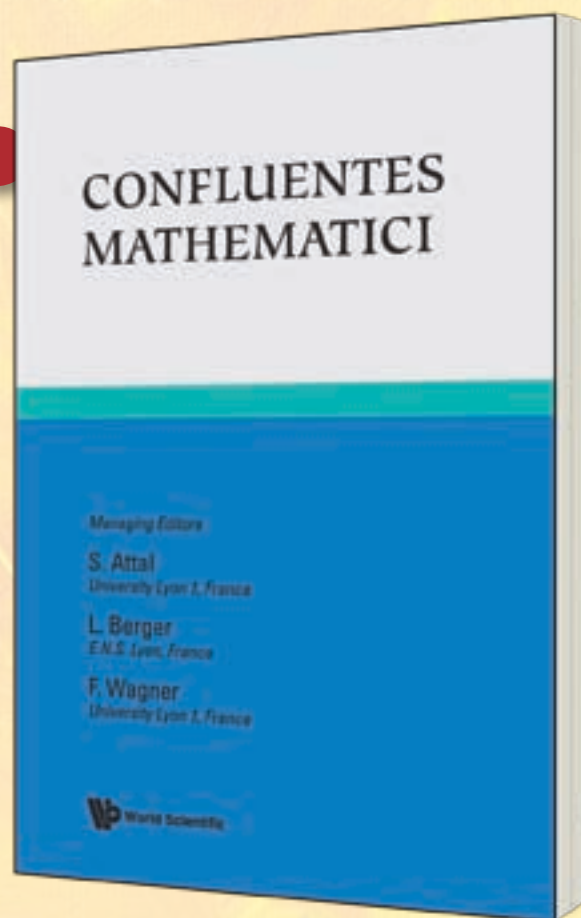

Volume: 1, Issue: 2 (October 2009)

- **Maximal Inequality for High-Dimensional Cubes**
Guillaume Aubrun (*Université de Lyon, France*)
- **Differentiability-Free Conditions on the Free-Energy Function Implying Large Deviations**
Henri Comman
(*Pontifical Catholic University of Valparaiso, Chile*)
- **Randomizations of Models as Metric Structures**
Itai Ben Yaacov (*Université de Lyon, France*) and
H. Jerome Keisler (*University of Wisconsin, USA*)

- **On Reality Property of Wronski Maps**
Eugene Mukhin, Vitaly Tarasov (*Indiana University – Purdue University Indianapolis, USA*) and Alexander Varchenko
(*University of North Carolina at Chapel Hill, USA*)
- **Quantum Trajectories in Random Environment: The Statistical Model for a Heat Bath**
Ion Nechita (*Université d'Ottawa, Canada*) and
Clément Pellegrini (*Institut de Mathématiques de Toulouse, France*)

Volume: 1, Issue: 1 (May 2009)

- **Slope Filtrations**
Yves André (*École Normale Supérieure, France*)
