★**The scientific legacy of Poincaré.**

Edited by Éric Charpentier, Étienne Ghys and Annick Lesne.

Translated from the 2006 French original by Joshua Bowman.

History of Mathematics, 36.

American Mathematical Society, Providence, RI, 2010. xiv+392 pp. ISBN 978-0-8218-4718-3

Contents: Étienne Ghys, Poincaré and his disk (17–46) [MR2647617 \(2011h:30066\)](#); Nicolas Bergeron, Differential equations with algebraic coefficients over arithmetic manifolds (47–71) [MR2647618 \(2011f:30088\)](#); Emmanuel Kowalski, Poincaré and analytic number theory (73–85) [MR2647619 \(2011f:11055\)](#); Jean-Pierre Francoise, The theory of limit cycles (87–97) [MR2647620 \(2011g:34064\)](#); Dominique Cerveau, Singular points of differential equations: on a theorem of Poincaré (99–112) [MR2647621 \(2011k:37033\)](#); Michael Nauenberg, Periodic orbits of the three-body problem: early history, contributions of Hill and Poincaré, and some recent developments (113–142) [MR2647622 \(2011g:37227\)](#); Nalini Anantharaman, On the existence of closed geodesics (143–160) [MR2647623 \(2011h:53040\)](#); François Béguin, Poincaré’s memoir for the prize of King Oscar II: celestial harmony entangled in homoclinic intersections (161–191) [MR2647624 \(2011j:37180\)](#); Étienne Ghys, Variations on Poincaré’s recurrence theorem (193–206) [MR2647625 \(2011e:37016\)](#); Guido Boffetta, Guglielmo Lacorata and Angelo Vulpiani, Low-dimensional chaos and asymptotic time behavior in the mechanics of fluids (207–223) [MR2647626 \(2011j:37181\)](#); Alain Yger, The concept of “residue” after Poincaré: cutting across all of mathematics (225–241) [MR2647627](#); Laurent Bessières, Gérard Besson and Michel Boileau, The proof of the Poincaré conjecture, according to Perelman (243–255) [MR2647628 \(2011h:53084\)](#); Jean Mawhin, Henri Poincaré and the partial differential equations of mathematical physics (257–277) [MR2647629](#); Pierre Cartier, Poincaré’s *Calculus of probabilities* (279–291) [MR2647630](#); Michel Mendès France, Poincaré and geometric probability (293–305) [MR2647631](#); Pierre-Paul Grivel, Poincaré, and Lie’s third theorem (307–328) [MR2647632 \(2011g:17001\)](#); Michel Le Bellac, The Poincaré group (329–350) [MR2647633 \(2011d:83004\)](#); Yves Pomeau, Henri Poincaré as an applied mathematician (351–371) [MR2647634 \(2011e:78001\)](#); Gerhard Heinzmann, Henri Poincaré and his thoughts on the philosophy of science (373–391) [MR2647635](#).
